EDUCATION

Jaypee Institute Of Information Technology

Bachelor of Technology in Computer Science and Engineering

Noida, Uttar Pradesh

2021 – 2025

St. John's Senior Secondary School

XII - Science

Meerut, Uttar Pradesh

2021

Intellectual Institute of Management and Technology

X - Science

Meerut, Uttar Pradesh

2019

SKILLS SUMMARY

Languages: C/C++, HTML/CSS, Python, React

Concepts: Data Structures, Algorithms, Data Center Infrastructure, Power Systems, UPS, PDUs, Cooling Systems

Tools: Basic Tableau, VsCode, IntelliJ, Jupyter, Linux, Windows, Networking Hardware, Cabling Tools, Monitoring Systems

EXPERIENCE

Curriculo

May 2026 – Present

Software Engineer

- Working on an Applicant Tracking System platform to support recruitment workflows, candidate management, and interview scheduling.
- Developing full-stack features involving frontend interfaces, backend APIs, database workflows, and recruiter-facing application modules.
- Implementing and improving reusable components, API integrations, and workflow logic to deliver a smoother recruiter and candidate experience.

ICS - Island Computing Services

January 2026 – April 2026

Intern

- Performed hands-on server maintenance tasks including hard disk replacement, hardware checks, basic troubleshooting, and support for reliable server operations.
- Worked with data center infrastructure components such as racks, structured cabling, network devices, power systems, cooling systems, and monitoring practices.
- Supported server room operations by tracking hardware issues, maintaining infrastructure readiness, and assisting with uptime-focused operational activities.
- Assisted in monitoring server health, identifying hardware faults, and coordinating maintenance activities to reduce downtime and improve system reliability.

Think41

April 2026

QAE Intern

- Performed manual, functional, regression, and UI testing across multiple application modules to validate product features, identify defects, and improve overall application reliability.
- Designed test cases, documented defects with reproduction steps, and coordinated with developers to verify bug fixes.

R Systems

June 2024 – July 2024

Software Engineer Intern

CERTIFICATE

- Completed a two-month internship at R Systems, gaining hands-on experience in data science, machine learning, and software engineering workflows.
- Worked on Exploratory Data Analysis, regression analysis, and Natural Language Processing tasks using Python.
- Applied data cleaning, preprocessing, feature selection, model evaluation, and validation techniques to build reliable analytical solutions.

PROJECTS

Plant Disease Detection System <i>CNN-Based Project</i>	Aug 2024-May 2025
• Built an automated potato disease detection system using CNNs, achieving high classification accuracy. • Designed a user-friendly interface for real-time disease predictions with confidence scores.	

Language Learning App - ToroTalk <i>Kotlin</i>	Feb 2024-May 2024
• Designed and built an app that helps users learn Spanish from English, focusing on user engagement and ease of use. • Analyzed user interactions to personalize learning paths and improve app effectiveness. • Ensured a user-friendly interface by implementing design principles that cater to both beginners and advanced learners.	

Bank Management System <i>C/C++</i>	Feb 2024-May 2024
• Designed a sample banking transaction system using C++ to simulate the common functions of using a bank account. • Implemented object-oriented programming practices such as inheritance to create different account types and databases.	

POSITION OF RESPONSIBILITY

Volunteer at Light De Literacy <i>NGO,JIIT Student Branch</i>	August 2021 – July 2023
Treasurer at Light De Literacy <i>NGO,JIIT Student Branch</i>	July 2023 – July 2024
Coordinator at Training and Placement Cell <i>Jaypee Institute Of Information Technology</i>	May 2023 – July 2024
